

MAHESHWARI ARULKUMAR

.NET Full Stack Developer | Software Engineer | C# | ASP.NET Core | React | Azure

Coimbatore, India | +91 63830 34859 | arulkumar.maheshwari@gmail.com

[linkedin.com/in/maheshwari-arulkumar](https://www.linkedin.com/in/maheshwari-arulkumar)

PROFESSIONAL PROFILE

Results-focused .NET Full Stack Developer with 3.6 years of commercial experience building and supporting enterprise web applications across language services and industrial inspection domains. Hands-on expertise in C#, ASP.NET Core Web API, .NET 8, React, TypeScript, SQL Server, Azure PaaS services, RESTful integrations, unit testing, and Agile delivery. Progressed from Trainee to Senior Engineer by taking ownership of full-stack features, real-time communication, performance tuning, database development, and production-quality fixes. Improved automated test coverage to 70% and resolved 300+ SonarQube vulnerabilities and security issues. Recognized for structured problem-solving, detailed documentation, mentoring, debugging, and reliable delivery.

CORE COMPETENCIES

Backend & API Engineering

- C#, .NET 8 / .NET Core
- ASP.NET Core Web API, REST
- Entity Framework, LINQ, DI

Quality, Security & Support

- xUnit, Moq, FluentAssertions
- SonarQube remediation & RBAC
- Debugging, RCA & production support

Frontend Engineering

- React.js, TypeScript, JavaScript
- Reusable components & API integration
- Lazy loading, HTML5, CSS3, Bootstrap

Azure & Integrations

- Azure Blob Storage, Functions, Service Bus
- PubNub, Twilio, FCM notifications
- Azure DevOps, Git & API integrations

Data & Performance

- SQL Server, T-SQL, stored procedures
- Query optimization & indexing
- Master, mapping & transaction tables

Agile Delivery & Collaboration

- Scrum ceremonies, Jira & Definition of Done
- Requirements analysis & task decomposition
- Code review, mentoring & documentation

PROFESSIONAL EXPERIENCE

Senior Engineer (Progressed from Trainee) | Eleviant Tech - CTG Group

Coimbatore, India | May 2022 - October 2025

- Delivered enterprise full-stack applications across React frontends, .NET backends, SQL Server data layers, and Azure services for global client engagements.
- Designed and implemented RESTful APIs using C#, ASP.NET Core, Entity Framework, LINQ, dependency injection, and stored procedures for scheduling, leave, status, and document workflows.
- Expanded from backend development into React and TypeScript within a **two-week project ramp-up**, then independently delivered full-stack features with reusable components, API integration, lazy loading, and linting standards.
- Implemented real-time status updates and notifications through PubNub, supported Twilio-enabled communication workflows, managed Azure Blob Storage, and delivered timezone-aware scheduling and notification behavior.
- Increased unit-test coverage to **70%** using xUnit, Moq, and FluentAssertions; resolved **300+ SonarQube vulnerabilities**, security issues, and code-quality findings to reduce technical debt.
- Optimized SQL queries and indexing, troubleshooted cross-layer issues, performed root-cause analysis, and partnered with QA on regression, release, and production validation.
- Conducted code reviews, mentored junior developers, prepared technical and process documentation, and participated in sprint planning, refinement, daily stand-ups, reviews, and retrospectives.

SELECTED PROJECTS

InterpVault - Interpretation Services Platform | BIG Language Solutions

Enterprise portal connecting clients and interpreters across phone, video-remote, and on-site interpretation workflows, with billing, user management, document storage, and role-based access.

Tech Stack: .NET 8, C#, ASP.NET Core Web API, React.js, TypeScript, SQL Server, Azure Blob Storage, PubNub, Twilio, Azure DevOps

- Delivered full-stack status-maintenance features for clients and interpreters using React components, TypeScript, REST APIs, SQL Server, and role-based access control.
- Built a recurrent leave-schedule API and timezone-aware functionality so schedules and notifications displayed according to configured local time zones.
- Implemented real-time status notifications through PubNub channels within a Twilio-enabled communication platform and handled network-failure scenarios.
- Improved frontend performance through React lazy loading and linting standards while supporting unit testing, code review, Azure Blob document workflows, and QA validation.

TK Inspection & TK Tracker | thyssenkrupp

Industrial inspection mobile and web solutions for job creation, work instructions, defect logging, reporting, leave administration, and portal-based widget tracking.

Tech Stack: .NET Core 3.1, .NET Framework 4.8, C#, VB.NET, SQL Server, HTML, CSS, Bootstrap, DevExpress, FCM

- Owned development of the leave-management Web API, including master, mapping, and transaction tables, stored procedures, and responses consumed by the mobile application.

- Implemented FCM notifications for leave requests, maintained version-controlled SQL and release scripts, and coordinated validation with QA and mobile teams.
- Upgraded legacy portal screens with Bootstrap, integrated stored procedures with VB.NET, and delivered change requests using DevExpress with sorting and filtering behavior.
- Completed the leave module ahead of schedule while the lead was unavailable, earning broader responsibility on the live client project.

CAREER RE-ENTRY & PROFESSIONAL DEVELOPMENT

Structured Professional Development | NexByte Solutions

2026 - Present | Training and project-based learning - not employment

- Undertaking structured learning in Agile fundamentals, leadership fundamentals, AI-assisted software development, prompt engineering, RAG, and Vibe Coding through guided hands-on projects.
- Refreshing .NET, React, Azure, REST API, microservices, CI/CD, performance, security, and system-design concepts through JD-specific technical preparation and practical edge-case analysis.
- Building project narratives, STAR stories, technical documentation, and structured problem-solving explanations to support a confident return to a full-time engineering role.

EDUCATION & PROFESSIONAL LEARNING

Academic Credentials

Master of Computer Applications (MCA)

Alagappa University | 2023 - 2025 | First Class, CGPA 7.5

Bachelor of Science in Computer Science

Ayya Nadar Janaki Ammal College | 2018 - 2021 | First Class, CGPA 8.3

Courses & Current Learning

NPTEL - Programming in Java

Completed course

Anthropic - Claude 101

Completed course

AI-Assisted Development, RAG & Vibe Coding

Structured professional development - in progress

TECHNICAL PROFICIENCIES

Languages & .NET

- C#, OOP, LINQ
- .NET 8 / .NET Core 3.1
- .NET Framework 4.8
- ASP.NET Core Web API
- VB.NET

Frontend

- React.js, TypeScript
- JavaScript, HTML5, CSS3
- Bootstrap
- Blazor (POC)
- DevExpress

Data & Quality

- SQL Server, T-SQL
- Entity Framework
- Stored procedures & indexing
- xUnit, Moq, FluentAssertions
- SonarQube

Cloud, Tools & Delivery

- Azure Blob, Functions, Service Bus
- Azure DevOps, Git
- Jira, Agile, Scrum
- PubNub, Twilio, FCM
- REST APIs, RBAC
